## **Acknowledgement**

The success and final outcome of this project required a lot of guidance and assistance from many people and we are extremely fortunate to have got this all along the completion of our project work. Whatever we have done is only due to such guidance and assistance.

We would not forget to thank I/C Principal Dr. Aditi Bhatt, Head of Department Dr. Vaibhav Desai and Project guide Prof. Khushbu Surati, and all other Assistant professors of SDJ International College, who took keen interest on our project work and guided us all along, till the completion of our project work by providing all the necessary information for developing a good system. We are extremely grateful to her for providing such a nice support and guidance though she had busy schedule managing the college dealings.

We are thankful and fortunate enough to get support and guidance from all Teaching staffs of Bachelor of Computer Application Department which helped us in successfully completing our project work. Also, we would like to extend our sincere regards to all the non-teaching staff of Bachelor of Computer Application Department for their timely support.

Dave Keyur H. (3031)

## 1. Introduction

### 1.1 Project Summary

The main purpose of “Book My Trip” is to provide a convenient way for a customer to book hotels, flight, train and bus for tour packages. The objective of this project is to develop a system that automates the processes and activities of a travel agency. In this project, we will make an easier task of searching places and for booking packages. In the present system a customer has to approach various agencies to find details of places and to book tickets. This often requires a lot of time and effort. We provide approach skills to critically examine how a tourist visits and its ability to operate in an appropriate way when dealing with the consequences of tourism, locally, regionally, and nationally including visitor security and ecological influences. It is tedious for a customer to plan a particular journey and have it executed properly. The project is developed to replace the currently existing system, which helps in keeping records of the customer details of destination as well as payment received.

This website is to provide best travelling packages to the customers and travel agents. We have developed Book My Trip to provide a search platform where a tourist can find their tour places according to their choices. This system also helps to promote responsible and interesting packages so that people can enjoy their holidays at their favorable places. This system also helps to develop tourism with different cultures so that they enrich the tourism experience and build pride. We develop this system to create and promote forms of tourism that provide healthy interaction opportunities for tourists and locals and increase better understanding of different cultures, customs, lifestyles, traditional knowledge and believes. This system also provides a better way to connect with various events.

**1.2 Project Technical Profile**

<b>Project Title:</b>	Book My Trip
<b>Developed For:</b>	S.D. J. International College, Vesu Surat
<b>Project Guide:</b>	Prof. Khushbu Surati
<b>Front End:</b>	Html, CSS, JavaScript
<b>Scripting language:</b>	PHP
<b>Back End:</b>	MySQL
<b>Operating System:</b>	Microsoft Windows 10
<b>Designing Tools</b>	Bootstrap, JavaScript
<b>Submitted By</b>	Dhaduk Arpit (3035) Dave Keyur (3031) Dodiya Darshan (3387)

## 2. Scopes & Planning

### 2.1 Requirement Analysis

To develop any web application system, it is most important to identify the user requirement in very specific manner. Also, to function properly, all interfaces of proposed system with surrounding system must be identified. The correct system is that satisfied all users requirement. Therefore, it is very important to analyze the existing system and to document the software requirement specification for proposed system which in turn provides the base for development of the proposed system.

Our project guide conducted a series of lectures to impart us the required knowledge about the system. During the lectures, we also had question and answer session at the end, which helped us to have a clear idea about the Expected system.

#### ➤ **Fact Gathering Techniques**

Fact –finding is the job of a person or group of people in administrative proceedings that has or have the responsibility of determining the facts relevant to decide a controversy. The term trier of fact gathering denotes the same function the process is an extremely important part of the communication process.

They are:

#### **i. Interview**

- This method is used to collect the information from groups or individuals. Analyst selects the people who are related with system for the interview.
- In this method the analyst sits face to face with the people and records their responses.
- All basic requirements are conducted at this stage.
- It is a basic source of qualitative information.

#### **ii. Questionnaires**

- It is the technique used to extract information from number of people. This method can be adopted and used only by a skillful analyst.

- The questionnaires consist of series of question framed together in logical manner
- In this, we get all information related to student fees collects related information.
- Gathering some data.

**iii. Records inspection**

- Records review is used to revise all the requirements before implementation.
- Here we revise all systems requirements like design & view of system facilities, policies, terms & condition, time-duration and all.
- Background reading or research is a part of the process.

**iv. Observation**

- Unlike the other fact-finding techniques, in this method the analyst himself visits the organization and observe and understand the flow of documents, working of existing System, the user of the system.
- At this stage, we consider all design & data related information like how to show our form, which kind of interface gives to user & going with all this.

**v. Conclusion of fact-finding technique**

- I have use observation technique.
- I have used all above mentioned technique to find and gathering information related to system but the one which i used most is observation technique.

**vi. Functional requirement (Admin)**

- Admin can also manage registration, verification process of user who registers.
- Admin manage facility for insert, update and delete packages.
- Admin can display facilities for product orders have.
- Admin can manage enquiry.
- Admin can show the users details, Total number of order and total amount.
- Admin can Change his profile.

**vii. Functional requirement (User)**

- User can register to the Book My Trip process system and log in it.
- User can forget password.
- Forgot password will change password by just entering valid email id and provide link of change the password in mail.
- User can click remember buttons in day often not entre email id and password to login website.
- If any inquiry or details are required then the user can also contact admin regarding Particular service.
- User can get Response for his Query from Admin.
- User can also check package Details on the website who uploaded by admin.
- User can see the package.
- User also have right to cancel booking.

## 2.2 Feasibility Study

This activity is design to help to do initial operational, technical, schedule & economic feasibility evaluation of the project and also practice these three approaches to cost benefit analysis knowledge of cost benefit analysis is critical for a successful systems analyst and also for anyone who must decide whether or not to approve a project. It is the measure of how beneficial or practical the development of information system will be to an organization.

### ➤ **Technical feasibility**

- It is measure of practicality of a specific technical solution and the availability of technical resources and expertise. All the software needed for developing the project are like sublime with php, MySQL are already available so the system is technically Feasible.
- Technical feasibility center on the existing manual system of the test management process and to what extent it can support the system.
- According to feasibility analysis procedure the technical feasibility of system is analyzed and the technical requirements such as software
- Facilities, procedure, inputs are identified. It is also one of the important phases of the system development activities.
- The system offers greater levels of user friendliness combined with greater processing speed. Therefore, the cost of maintenance can be reduced.

## 2.3 Timeline Chart

Work Tasks	Dec		Jan				Feb				March				April			
Week	3	4	1	2	3	4	1	2	3	4	1	2	3	4	1	2	3	4
<b>1.Requirement Gathering &amp; Analysis</b>																		
1.1 Learn PHP																		
1.2 Requirement Gathering

<b>Milestone: Requirements Gathered.</b>																		
<b>2.Modeling</b>																		
2.1 Identifying proposed project profile.																		
2.2 Identifying Objectives.																		
2.3 Scope definition.																		
2.4 Review.																		
<b>Milestone: Modeling Completed.</b>																		
<b>3.System Design</b>																		
3.1 Design system flow.																		
3.2 Database Design.																		
3.3 Admin Side Design.																		
3.4 Client-Side Design																		
3.5 Review.																		
<b>Milestone: System Design completed</b>																		
<b>4.Coding</b>																		
4.1 Admin Side Coding																		
4.32Client-Side Coding																		
<b>Milestone: Coding completed</b>																		
<b>5.Testing</b>																		
5.1 Unit Testing																		
5.2 Navigational Testing																		
5.3 Functional Testing																		
5.4 Environmental Testing																		
<b>Milestone: Testing Complete</b>																		
<b>6. Documentation</b>																		

## **2.4 Future Development**

- The Book My Trip provides some of the type products which are most frequently sell in e-commerce website. This system accommodates the changing needs of the seller.
- Enhancements Of products price and discounts.
- Developed in Application.
- Further this website can be prolonged by merely adding up the required services and additional payment systems. Currently this website provide only admin and sub admin can manage the products and products stock and category of products further the website can extend as per the requirements of the user. This website can have prolonged by adding services such as exchange the products, payment using debit card or credit card get 10% discounts and many more.

## 2.5 Technology Details

### ➤ Hardware Requirement

<b>Processor</b>	: i5 5 <sup>th</sup> generation or above
<b>Ram</b>	:6.00 GB
<b>HDD</b>	:250 GB
<b>SSD</b>	:250 GB

### ➤ Software Requirement

<b>Operating System</b>	: Windows 10 Home
<b>Front End</b>	: Html, CSS, JavaScript
<b>Back End</b>	: MySQL
<b>Code Behind</b>	: PHP
<b>Other Tools Used</b>	: Bootstrap

This is a pdf report which contains info regarding boking.

## VI. Manage Package

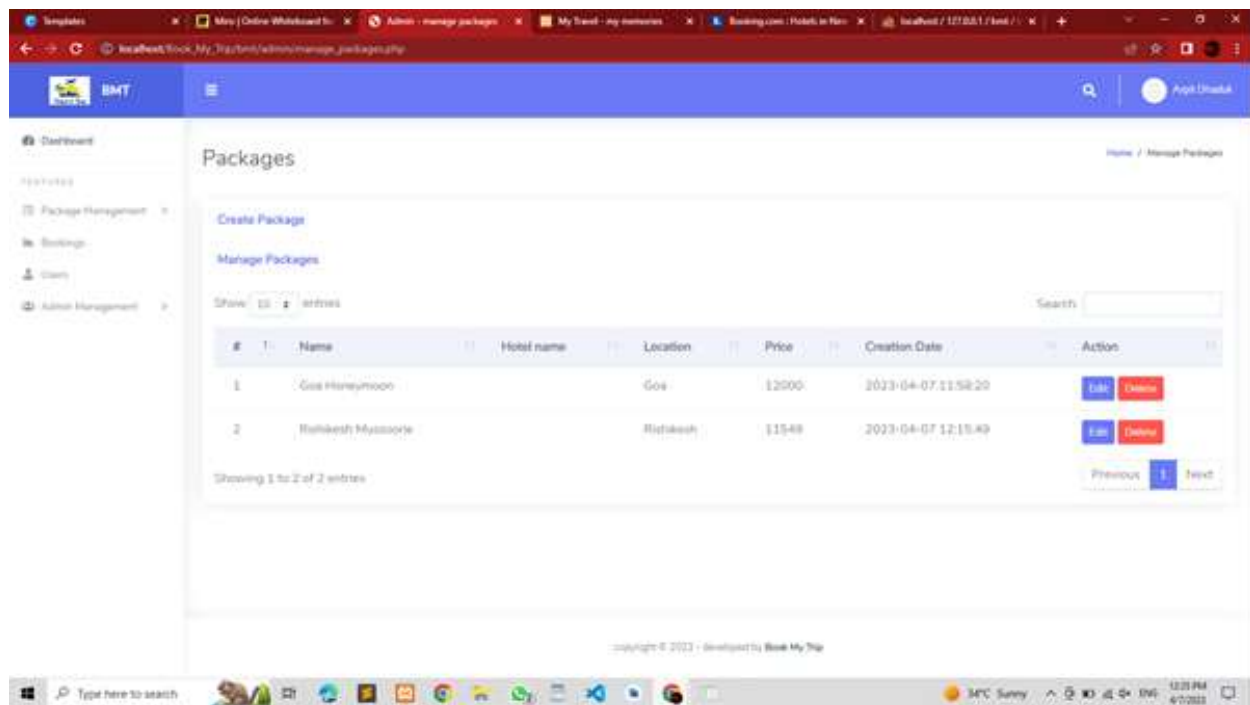

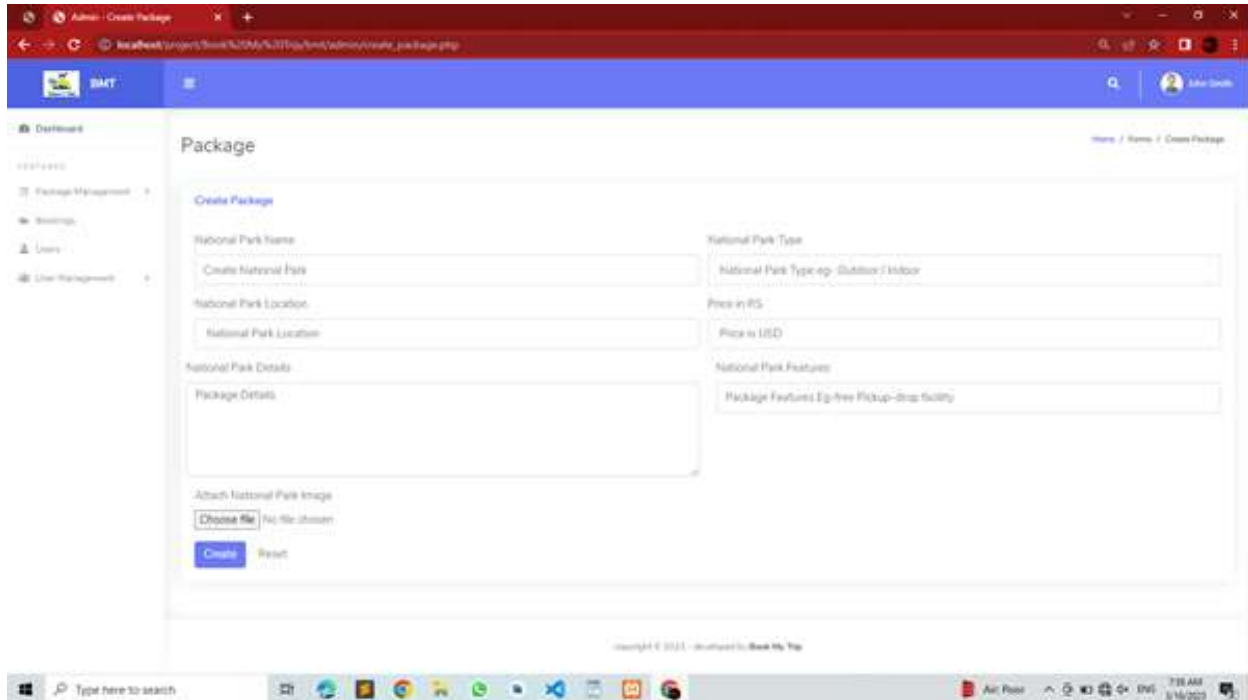

Figure 34

Description: -

This page provide list of available packages and user can delete or edit particular package.

## VII. Create Package

The screenshot shows a web browser window with the URL `localhost:3000/SDJ/BookMyTrip/admin/create_package.php`. The page title is "Package" and the breadcrumb is "Home / Admin / Create Package". The form is titled "Create Package" and contains the following fields:

- National Park Name:
- National Park Location:
- National Park Type:
- Price in RS:
- National Park Details:
- National Park Features:

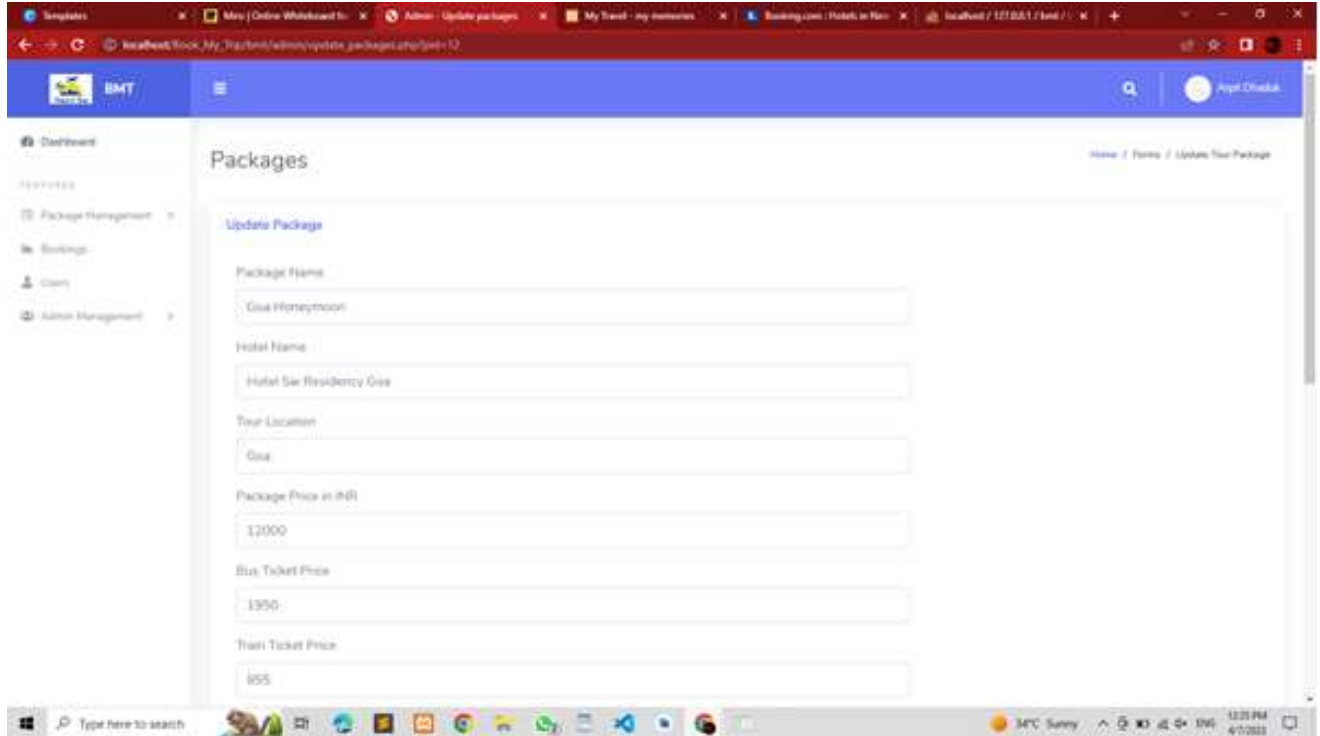

Below the form, there is a section for "Attach National Park Image" with a "Choose file" button and a "No file chosen" status. At the bottom of the form, there are "Create" and "Reset" buttons. The footer of the page says "Copyright © 2021 - Developed by: Book My Trip".

Figure 35

The screenshot shows a web browser window with the URL `localhost/Book_My_Trip/Book/admin/update_package.php?id=12`. The page contains a form for updating a travel package. The form fields are as follows:

- Train Ticket Price:** A text input field containing the value `855`.
- Flight Ticket Price:** A text input field containing the value `5000`.
- Meal:** A text input field containing the value `3 time Meals are included`.
- Package Details:** A text area containing the following text:
 

The best part about booking a trip with us is that our 4 nights 5 days Goa couple packages can be easily customized as per your pocket and preferences, imparting you a vacation together, just as you want. Your trip of togetherness is laced by other attractions such as a romantic cruise, candlelight dinner, beach hopping, and an exciting nightlife. If you and your beloved are interested to have a glimpse of the past, head to Fort Aguada to absorb the Portuguese charm.
- Package Image:** A section containing a small image of a beach scene and a `Change Image` link.
- Last Update Date:** A text input field containing the value `2023-04-07 12:06:19`.
- Update:** A blue button at the bottom of the form.

The browser's taskbar at the bottom shows the Windows logo, a search bar, and various application icons. The system tray on the right indicates a temperature of `34°C Sunny` and the time `12:08 PM 4/7/2023`.

## VII. Package Details

The screenshot displays a web browser window with the URL `localhost/Book_My_Trip/tem/package_details.php?page=12`. The page features a navigation bar with links for 'My Profile', 'Change Password', 'My Tour History', 'Welcome : arpitkushk@gmail.com / Logout', and a 'Traveller' section. The main content area highlights the 'Goa Honeymoon' package (AFWG-12) with a package price of **RS.12000**. The package details include:

- Hotel Name :** Hotel Sea Residency Goa
- Location :** Goa
- Meal :** 3 time Meals are included
- Bus Ticket Price:** 1850
- Flight Ticket Price:** 5000
- Train Ticket Price:** 850

The 'Package Details' section provides a comprehensive description of the trip, mentioning a 4-night 5-day itinerary, customization options, and a list of activities and locations in North and South Goa, including beaches, temples, and local cuisine.

Description: -

This is a pdf invoice which contains info regarding booking.

## 4. Testing

### 4.1 Unit Testing

#### (1) Admin Testing

##### Test Case for Admin – Login

Test Id	Test field	Step Execute	Executed Result	Actual Result
1	E-mail	Empty	Msg. Required	As Expected
2	E-mail	Wrong	Msg. please correct Your Email or password	As Expected
3	Password	Empty	Msg. Required	As Expected
4	Password	Wrong	Msg. please correct your Email or password	As Expected

##### Test Case for Admin - Change Password

Test Id	Test field	Step Execute	Executed Result	Actual Result
1	E-mail	Empty	Msg. Required	As Expected
2	E-mail	Wrong	Msg. please correct Your Email or password	As Expected
3	Password	Empty	Msg. Required	As Expected
4	Password	Wrong	Msg. please correct your Email or password	As Expected

**Test Case for Admin – Member**

Test Id	Test field	Step Execute	Executed Result	Actual Result
1	Select Permission	Empty	Msg. You must choose an item from list	As Expected
2	User Name	Empty	Msg. Required	As Expected
3	Last Name	Empty	Msg. Required	As Expected
4	First Name	Empty	Msg. Required	As Expected
5	Staff ID	Empty	Msg. Required	As Expected
6	Mobile Number	Empty	Msg. Required	As Expected
7	E-mail	Empty	Msg. please correct Your Email or password	As Expected
8	Password	Empty	Msg. Required	As Expected
	Confirm-Password	Empty	Msg. Required	As Expected
9	Confirm-Password	Wrong	Msg. Password and Confirm Password Field do not match !!	As Expected

**Test Case for Admin – Package**

Test Id	Test field	Step Execute	Executed Result	Actual Result
1	Package name	Empty	Msg. Required	As Expected
2	Package Price	Empty	Msg. Required	As Expected
3	Package Description	Empty	Msg. Required	As Expected
4	Tour Location	Empty	Msg. Required	As Expected
5	Hotel Name	Empty	Msg. Required	As Expected
6	Bus Proce	Empty	Msg. Required	As Expected
7	Flight Price	Empty	Msg. Required	As Expected
8	Train Price	Empty	Msg. Required	As Expected
	Image	Empty	Msg. Required	As Expected

## (2) User Testing

### Test Case for User – Registration

Test Id	Test field	Step Execute	Executed Result	Actual Result
1	Full Name	Empty	Msg. Required	As Expected
2	E-mail	Empty	Msg. Required	As Expected
3	Mobile No	Empty	Msg. Required	As Expected
4	Password	Empty	Msg. Required	As Expected

### Test Case for User – Login

Test Id	Test field	Step Execute	Executed Result	Actual Result
1	E-mail	Empty	Msg. Required	As Expected
2	E-mail	Wrong	Msg. please correct Your Email or password	As Expected
3	Password	Empty	Msg. Required	As Expected
4	Password	Wrong	Msg. please correct your Email or password	As Expected

### Test Case for User – Book

Test Id	Test field	Step Execute	Executed Result	Actual Result
1	From Date	Empty	Msg. Required	As Expected
2	Medium	Empty	Msg. Required	As Expected
3	Person	Empty	Msg. Required	As Expected

**Test Case for User – Payment**

Test Id	Test field	Step Execute	Executed Result	Actual Result
1	CVV	Empty	Msg. Required	As Expected
2	User Name	Empty	Msg. Required	As Expected
3	Card name	Empty	Msg. Required	As Expected
4	Card number	Empty	Msg. Required	As Expected
5	Exp Year	Empty	Msg. Required	As Expected
6	Exp Month	Empty	Msg. Required	As Expected
7	E-mail	Empty	Msg. Required	As Expected

## 4.2 Navigation Testing

### Admin

Link	Expected Page	Result Of Page
<b>Admin Login</b>	Admin Login page	Admin Login Page
<b>Admin Edit Profile</b>	Admin Edit Profile Page	Admin Edit Profile Page
<b>Admin Change Password</b>	Admin Change Password Page	Admin Change Password Page

<b>User Login</b>	User Login page	User Login Page
<b>User Home</b>	User Home Page	User Home Page
<b>Package Detail</b>	Package Detail Page	Package Detail Page
<b>Book</b>	Book Page	Book Page
<b>Tour History View</b>	Tour History Page	Tour History Page
<b>Contact us</b>	Contact Us page	Contact Us page

### 4.3 Functional Testing

- Login and Password validation process has been co-operated properly.
- Email system module has been done properly and accurately.
- Sending Forgot Password through mails is working properly.
- Visibility of category wise product are working Properly.
- User registration is working Properly.
- Product stock manage properly.
- Invoice download pdf format is working properly.
- File Upload Images work properly
- Notifications of add to cart product Displaying Properly.
- All Pages Design is perfect.

#### **4.4 Environment Testing**

- Firefox browser, Internet explorer and chrome consider testing for environment operability of software
- Web server – Apache/xampp
- Database – MYSQL Server
- OS – Windows 10
- Browser – Firefox/ Internet Explorer/ Chrome

## 5. Conclusion

- Technology has made significant progress over the years to provide consumers a better online shopping experience and will continue to do so for years to come. With the rapid growth of products and brands, people have speculated that online shopping will overtake in-store shopping.
- While this has been the case in some areas, there is still demand for brick and mortar stores in market areas where the consumer feels more comfortable seeing and touching the product being bought. However, the availability of online shopping has produced a more educated consumer that can shop around with relative ease without having to spend a large amount of time.
- In exchange, online shopping has opened up doors to many small retailers that would never be in business if they had to incur the high cost of owning a brick and mortar store. At the end, it has been a win-win situation for both consumer and sellers.
